THERMAL FOGGING SOLUTION

Our Highly Specialised Fogging Service is effective for keeping viruses at bay. It is a high level disinfectant shock treatment that bonds virtually to everything killing 99.99% of all illness causing microbes, including corona virus on surface areas

WHY: Kills 99,99% of viruses on surface areas, including the corona virus

HOW: Use of heated steam fog, couples with the SABS approved chemical SaniGuard®

WHEN: The treatment can be done when the premises is vacant. It is most effective when done every 2 weeks

WHO: Our service is carried out by trained and certified personnel

Advantages

- Kills germs, bacteria and viruses in less than a minute
- Dries on contact
- Safe to use on electrical equipment
- “Hand-off” application, no wiping or scrubbing required
- No dermal and/or oral inhalation toxicity
- SABS approved for use in food preparation/storage areas

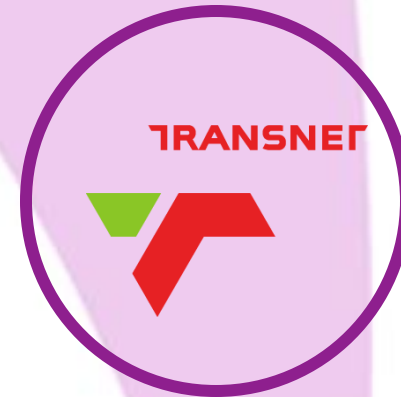

QUALITY MANAGEMENT SYSTEMS
